

POLICY STATEMENT ON ELIGIBILITY FOR CLINICAL TRIALS

In order to expand access to new approaches to cancer care through clinical trials, our practice has instituted a policy of chart review by cancer research nurses from the Christiana Care Cancer Center Research Office.

Your participation in this review is purely voluntary and will not affect the care given our practice. Please feel free to discuss any concerns with the staff or your physician.

I understand that a nurse from the Christiana Care Cancer Center Research Office will review my records for the sole purpose of determining my possible eligibility for a clinical trial. I realize that I am under no obligation to do this. I understand that in no way will my care be affected whether or not I sign my consent.

I understand that the information obtained from these records will be kept strictly confidential, shared only with my doctor and his staff. My doctor will discuss with me any treatment options that are available to me. I understand that by granting this permission to review, I am in no way committing to any treatment. I also understand that I may withdraw this consent at any time by notifying my doctor.

I give my consent _____

I do not give my consent _____
